
NOKIA

CORRECTIVE FIELD SERVICES

Nokia is responsible for managing and maintaining VHA network on more than 5000 sites across Australia.

In 2015 Tempo was awarded a contract to provide generator deployment on planned and reactive jobs. Over time the scope has increase and Tempo now manages the corrective field maintenance services contract for metro and regional areas of Australia.

The delivery includes upgrade of cooling systems (air-conditioner supply, installation and repair), electrical works inside and outside VHA shelters, planning generator deployment and recovery, DC system battery replacement, compound maintenance (locks, graffiti, fence repairs and pest control).

In the unfortunate event of a natural disasters (floods and storms) Tempo has provided rapid support to Nokia ensuring VHA networks remain live.

The logo for Tempo, featuring a lowercase 't' in blue followed by 'empo' in black.
