
PORT OF MELBOURNE

ASSET MANAGEMENT SERVICES

The Port of Melbourne is the nation's busiest containerised and general cargo port including hazardous berths and petroleum. The port is spread across over 140,000 square metres, and operates over 30 shipping berths and 16 rail platforms.

In 2015 Tempo was awarded a holistic electrical infrastructure management and maintenance contract which extends to 2023.

The delivery includes but not limited to area lighting, minor installation works, high voltage reticulation, CCTV system, vehicle recognition systems, generator maintenance, cruise ship operations, compliance maintenance, ship access, airbridge systems and berth lighting towers.

By working in a flexible and collaborative approach Tempo has successfully managed to handle the challenges faced operating in a busy working port.
