Cockram Construction and Australian Red Cross Blood Service

LOCATION
Wellington St, Perth, WA

SECTOR
Healthcare

DISCIPLINES
Electrical, Communications, Mechanical

CONTRACT DATES
July 2014 - current

PROJECT SUMMARY
This project involves an electrical services upgrade of the Red Cross blood bank facility in Perth’s CBD, staged over three years.

Scope includes installation and cutting over high voltage power supplies, backup generator and UPS systems, while maintaining critical services to the site.

The project also involves installation of full lighting, as well as fire and security upgrades to the building.

SCOPE OF WORK
Staged installation of complete electrical services including:

- New high voltage switch room, site main switchboards, generators, fuel systems and UPS backup systems and associated controls.
- Security, CCTV and access control services, fire systems data and communications infrastructure.
- General lighting and power fitouts for facility and administration areas.
